🔗 smrishin.github.io

Full-stack and cloud engineer with 5+ years of experience building scalable web apps, APIs, and AWS infrastructure using JavaScript, TypeScript, Python, React, Vue, Node.js, and Terraform. Pursuing an MBA to enhance leadership and strategy skills, complementing technical expertise to drive innovation.

EDUCATION

Master of Business Administration	4/4	Trine University, Phoenix, AZ
Master of Science in Computer Science	3.55/4	New Jersey Institute of Technology, Newark, NJ
Bachelor of Tech. in Computer Science	8.05/10	Nitte Meenakshi Institute of Technology, Bengaluru, India

EXPERIENCE

Founding Member, CartCo Tech - Remote — November 2025 to Present

- Drove early-stage business buildout from 0 to production, shaping product direction, technical planning, operations, and growth for a quick commerce platform in India.
- Led ongoing market analysis, competitor benchmarking, and pricing research to continuously refine product positioning and identify sustainable user acquisition opportunities, reaching 1000+ customers within 2 months of launch.
- Defined market strategy and contributed to budget planning aligned with financial targets, long-term growth, decision-making.
- Designed and developed a scalable multi-app ecosystem for customers, vendors, delivery partners using React, NestJS, AWS.
- Set up deployment architecture and CI/CD workflows with GitHub, Railway, Vercel, and Firebase, enabling stable releases and faster iteration across multiple apps.

Associate Technical Lead, OneOrigin Inc - Scottsdale, AZ, USA — September 2021 to July 2024

- Built and maintained 4 high-traffic web applications across frontend and backend using React, Vue.js, JavaScript/TypeScript, and Python, serving 100k+ users on AWS.
- Developed 30+ REST APIs with Flask and Node.js, handling 500k+ API calls per month with authentication and rate limiting.
- Architected scalable serverless AWS infrastructure with Terraform, improving reliability, security, and cost efficiency.
- Led a team of 3 developers, improved delivery efficiency by 30%, and shipped projects up to 4 weeks ahead of schedule.
- Built CI/CD pipelines with Jenkins and Bitbucket, reducing deployment time by 50%.
- Built an AI-driven course creation platform using Gemini APIs, accelerating curriculum and quiz generation for instructors.
- Collaborated with cross-functional Scrum teams, clients, and product managers to gather requirements, align priorities, balance technical feasibility with business goals, and deliver high-value solutions for end users.

Software Developer, S-Clinical Solutions - The Woodlands, TX, USA — August 2019 to December 2020

- Designed a Clinical Trial Management System with Django and SQL, integrating real-time update, approval, and storage functionalities to boost trial management efficiency and accuracy.
- Enhanced system accessibility and user engagement by incorporating Google Geo-location for location-based features and Facebook & Twitter APIs for seamless social media integration.
- Enhanced communication and user experience through email and phone APIs, streamlining system interactions.

PERSONAL PROJECTS

CodeReal (2025) — Built an AI mock interview platform that generates company-specific coding questions and provides real-time feedback. Integrated Google Gemini for question generation and analysis, and leveraged LeetCode's environment for live code execution using Next.js, Node.js, and Vercel.

SKILLS & CERTIFICATIONS

AWS Certified Cloud Practitioner: [Credentials](#) — February 2025 to February 2028

Programming Languages: JavaScript, Python, Typescript **Frontend:** HTML, CSS, React, Next, Vue.js, Nuxt.js, Tailwind CSS

Backend: Node.JS, Express.JS, Flask, Django, Terraform, Serverless, JWT, Mocha, Chai, Jest

Database: Postgres, MongoDB, DynamoDB, MySQL **Cloud:** AWS, Terraform, Serverless, Jenkins, Docker, Kubernetes

Tools: Git, GitHub, Bitbucket, OpenAI, Gemini, Salesforce, Stripe, PayPal

Business & Leadership: Product Strategy, Go-to-Market Support, Market Research, Pricing Analysis, Client Engagement
